

Solar Thermal Systems

STS is a national primary packager of certified solar thermal hot water systems, solar collectors, tanks and other quality solar thermal components serving the specification, wholesale and contractor community.

PROFESSIONAL SOLAR SYSTEMS

Do The Right Thing! Solar Thermal Makes Sense!

A standard STS Solar System will displace a ton of carbon emission each year while saving current and future utility costs, as well as providing generous Title 24 credit on new construction and remodeling.

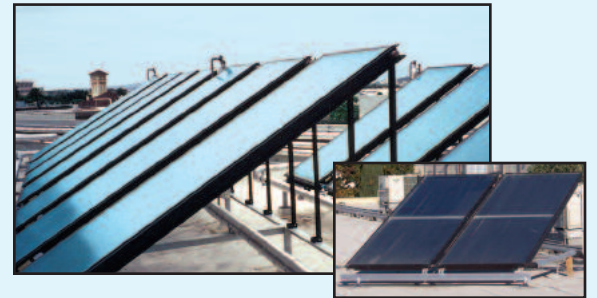

Solar Hydronics

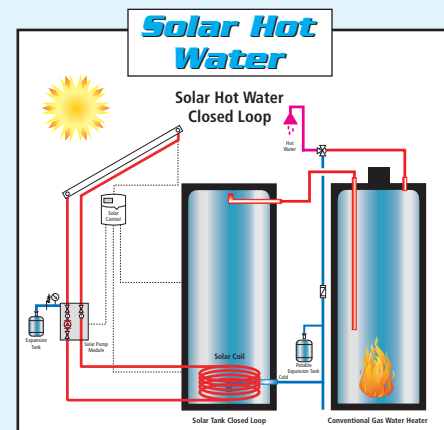

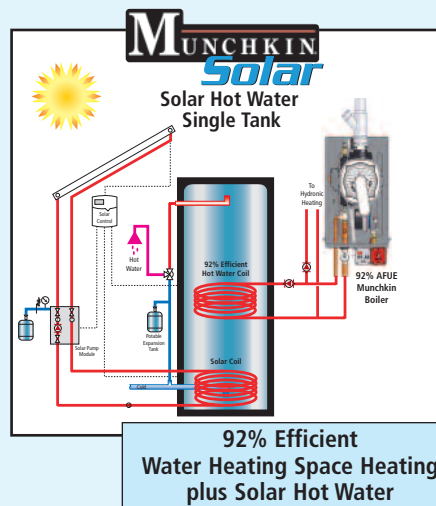

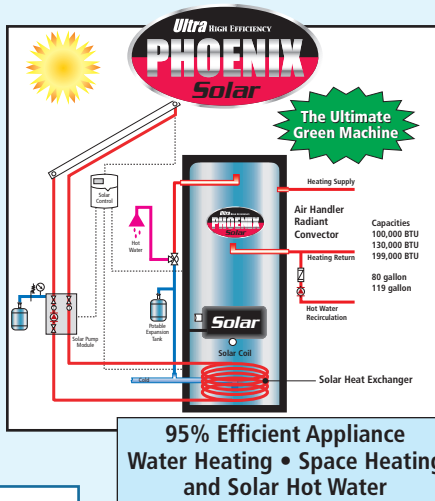

Solar water heating alone is a great idea, but a fully integrated, high efficiency solar hot water hydronic system is the answer to **Real Whole House Efficiency**. For residential new construction or remodeling, we have durable, easy to install, cost effective solar solutions to meet many different applications.

Commercial Solar Thermal

The large loads experienced in commercial applications and uncapped 30% solar tax credits plus high efficiency rebates in some areas, make integrated 95%+ gas fired and solar hot water supply a real financial winner.

SRCC CG300 Performance Certified Systems

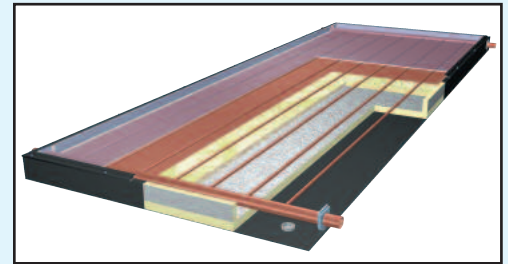

Solar Thermal Systems

The Economics of Quality: Its Got To Last

Years of experience have taught us that optimum solar system return on investment is very reliant upon durable components, configured within proven system configurations, installed by professional contractors. We provide top quality components because the economics of solar demands effective performance day in and day out for many years with minimal servicing.

Solar Collectors

Quality copper tube, aluminum framed flat plate solar collectors and racking systems with over thirty years of excellent field service.

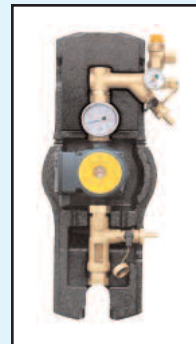

Solar Tanks

Premium stainless steel and builder model glass lined closed loop single and dual coil heat exchanger solar tanks from 50 to 1500 gallons.

Pump Modules

Pre plumbed and pre insulated professional solar pump modules that include all the valves and accessories in one clean package.

Controls

We offer a selection of on/off differential and variable speed solar, set point and injection controls for every application.

Circulators and Pumps

Taco has the best selection of circulators specifically for solar and packaged solar modules.

Solar Accessories

Yes, we carry anti freeze, roof jacks, vents and valves plus all the other items to make a residential or commercial system go.
